

Creating & Managing Classes

Registration

When creating a CW account you have several options..

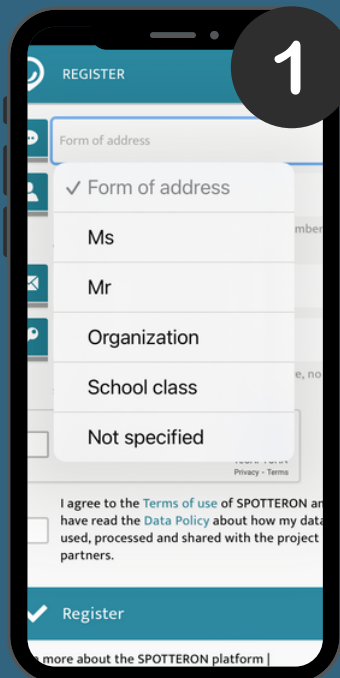

- Individual (e.g. Ms, Mr, Not Specified)
- Organisation
- School Class

Organization and Class accounts allow multiple devices to be logged in simultaneously, however they don't allow individual names to be shown within (e.g. 20 individual students will be shown as 1 class)

- Pros = Maximize group impact, ease of use
- Cons = Difficulty differentiating individual contributions (how to mark student assessments?)

Recommendation

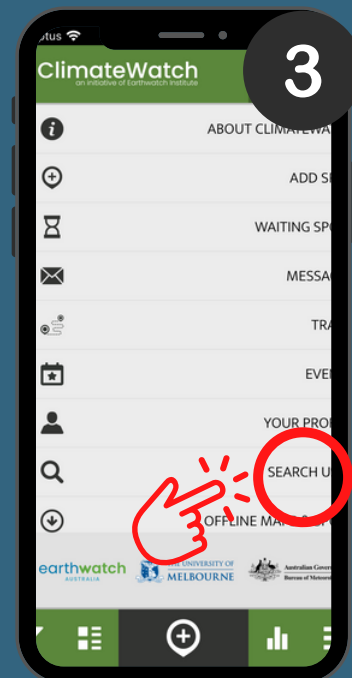

Have students create Individual accounts, then teachers utilize the social features of the app to monitor student's progress! See below for steps.

Students Register Individual Account

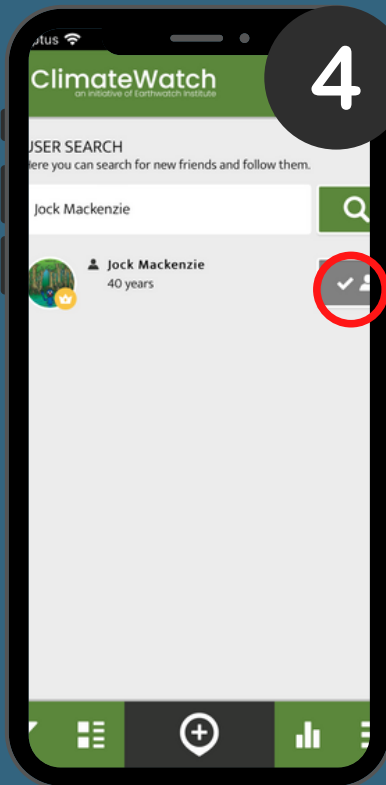

When in app, go to main menu (3 lines icon)

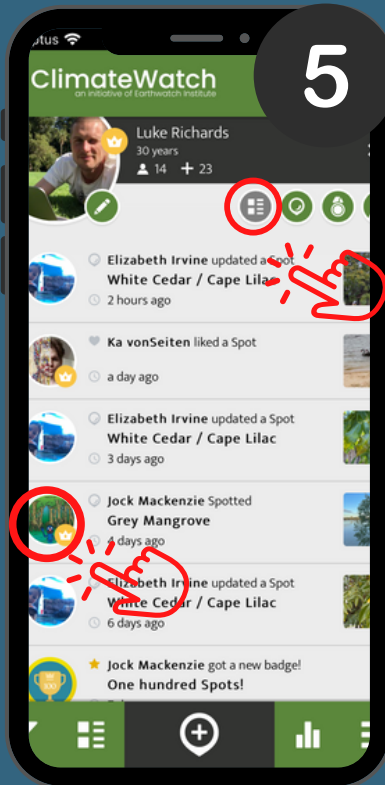

Click on search user

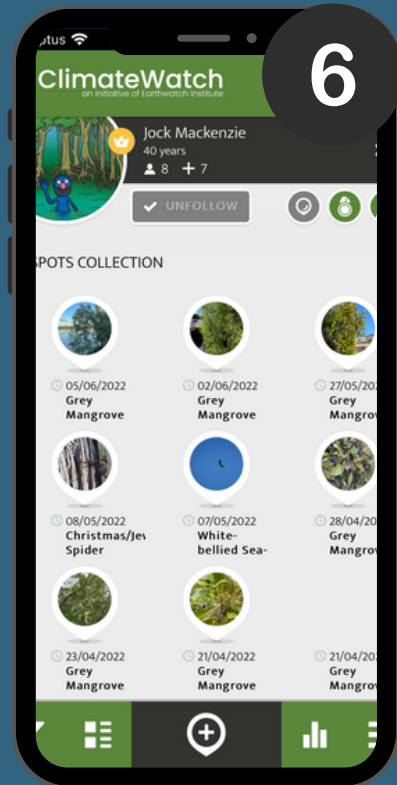

Creating & Managing Classes

Students search for teacher/peer's accounts. Click the follow icon on the right.

Students start following teacher/peer's. Click on your notifications to see updates as they happen.

Check out your follower's (e.g. student's) page for catalogue showing all spots taken to date.

Thank you for your commitment to understanding and protecting the environment and climate.
